## Care instructions

---

Please follow these instructions to enjoy your Eyelash Extensions as long as possible

### Do's

- to keep your extensions as long as possible, you should brush your eyelashes regularly
- If you want to use mascara despite extensions, you are best to brush only the tips and not the eyelash base. In order to clean the lid optimally, you should use a cotton bud.
- Attention! Waterproof mascara can loosen the eyelash glue!
- use non-greasy and oil-free cosmetic products

### Don'ts

- in the first 48 hours after the treatment, your eyelash extensions may not come into contact with water
- Creams & Co. are also taboo in this time, since the adhesive is fully cured only after two days
- sauna, steam baths and solarium please reduce and are also possible at the earliest 48 hours after the treatment
- please also pay attention to the steam when cooking
- eyelash curler is taboo
- don't rub your eyes and eyelash and gently dab dry
